Saturday, May 26th & Sunday, May 27th, 2012
10:00am – 5:00pm
\$199.00 + tax

As many of you may already know the children today are demonstrating many more physical, emotional, food and environmental sensitivities. The children of today are also much more psychic and spiritually aware than ever before. Traditional systems are simply not able to support these changes and advances in our children. Many of these children are often being misdiagnosed with a variety of learning disabilities, ADD, ADHD, Autism, and Asperger's Syndrome, Non-verbal etc..while others just struggle to cope in their everyday life. Some children are failing to thrive in traditional educational systems and parenting models. Some children are so spiritually aware and psychic that parents and care givers simply don't know how to respond or help. Many children today are responding to the many toxins in our air, food and other household products.

These children often fit the characteristics of Indigo, Crystal, Rainbow, Star or Diamond Children. They have many highly evolved gifts and abilities that are unrecognized. These children know who they are and require new approaches to learning, communication, education, nutrition, exercise, spirituality, and assistance in understanding their life purpose.

This workshop will explore each of the characteristics of these children. We will explore strategies and techniques for helping them thrive. We will also explore how to effectively enhance and support their spirituality, sensitivity, and intuitive gifts. If you are having any difficulty relating to or helping children at home, at school, in your work, then this workshop will provide fresh perspectives and many tips to help you. If you want to expand your spiritual knowledge of the coming generations of highly gifted children this workshop will offer many insights.

Come and learn how these wonderful children
are playing a vital role in the evolution of humanity and our planet.
